PROJECTS

Uber Supply Demand Gap Analysis | *Excel, SQL*

- Cleaned and transformed Uber request data (6.7K records) using Excel by standardizing timestamps, handling missing values, and engineering features such as travel time and timeslot categories for structured analytics.
- Built Excel dashboards and executed SQL queries to analyze supply-demand gaps, cancellations, and no-car availability, identifying critical shortages during Night and Early Morning with actionable recommendations.

Dubai Real Estate Intelligence Dashboard | *Power BI, Power Query, Excel*

- Cleaned and enriched Dubai housing dataset (location, price, size, property type, developer, year built, etc.) using Power Query by removing duplicates, correcting data types, and creating calculated fields such as price per sqft, property age, and listing category.
- Designed an interactive Power BI dashboard with KPI cards, bar/stacked column charts, maps, treemaps, and slicers to analyze property prices, trends, and distributions, delivering insights for investors and agents such as high-demand locations and developer-wise property performance.

Flipkart Big Billion Days Sales Dashboard | *Power BI*

- Built an interactive Power BI dashboard analyzing Flipkart's Big Billion Days sales, featuring visuals for revenue trends, top-selling products, category contributions, regional sales, payment preferences, and discount tiers.
- Performed data cleaning and transformation in Power Query, created calculated columns and measures, and applied slicers and filters to enable dynamic analysis and actionable business insights.
